3.3 INNOVATIVE DESIGN RESIDENTIAL DISTRICT – R1B

This District is generally intended to provide for a street-oriented mix of comprehensively planned lots for one family and two family developments of a one family character. A high quality of design and livability is essential. This District will normally be applied in new areas, in areas close to the Town Centre, and on sites which due to their size, configuration and location, are appropriate for comprehensive planning.

This District will be used where planned zero lot line dwellings are proposed. Zero lot line developments provide for greater usable yard space on each lot and in some instances smaller lot sizes. Zero side yard developments require that planning for all of the house locations is done at the same time in order to ensure that the predominately single-family detached character of the district is maintained.
