## ELECTRICITY METER UPGRADES

ATCO will soon be in your neighborhood to upgrade your electricity meter. The new meters will allow us to continue to provide safe and reliable electricity and expand on the services we can provide to you.

Questions? Visit [Electric.ATCO.com/AMI](http://Electric.ATCO.com/AMI) or call 1-800-668-2248

### AMI meters — How do they work?

Our meters use a radio frequency (RF) to receive and transmit information, but the RF emissions from our meters are minimal and aligned with Health Canada Standards. According to several studies, there are no health risks from our meters, due to low power signals, proximity to you and your family, and there are only short bursts of activity rather than continuous.

Your exposure to radio frequency EMF from smart meters is very low. This is because:

- smart meters emit relatively low power signals
- there is distance between your body and smart meters
- smart meters transmit data in short bursts, not continuously
- when smart meters are not transmitting a signal, they do not emit radio frequency EMF

You do not need to take any precautionary measures to reduce your radio frequency EMF exposure from smart meters because the exposure levels are far below Canadian safety limits.
